Q-1 Read the two given passages and answer the following questions –(Do it in your notebook)

Lily was a little girl who loved flowers. She had a small garden in front of her house where she grew many colourful flowers. Every morning, Lily would water her flowers and talk to them. She believed that talking to flowers made them happy and helped them grow. One day, while watering her garden, Lily noticed a tiny seed on the ground. She picked it up and planted it in her garden. Every day, she took special care of the seed, watering it and giving it plenty of sunshine.

1. What did Lily love?
2. Where did Lily have her garden?
3. What did Lily do with the seed?
4. Find common noun and proper noun from above passage.

Honeybees are tiny insects that work extremely hard. They live in colonies and have particular tasks to complete. Some bees collect nectar from flowers, while others remain within the hive to protect it. The nectar gets turned into honey, which is stored in honeycombs. Honeybees are crucial to plants because they help in pollination. Many fruits and vegetables couldn't survive without the presence of bees. People benefit from honeybees by collecting honey and beeswax. However, honeybees face threats such as pesticides and habitat loss. It is critical to safeguard these small but important creatures in order to maintain the natural balance.

Questions:

1. What are honeybees?
2. What do honeybees collect from flowers?
3. Name two dangers that honeybees face.
4. Find common noun and proper noun from above passage.
